

Lexicon Pharmaceuticals to Present Additional Clinical Data on Pilavapadin at Three Upcoming Medical Meetings

September 11, 2025

Presentations collectively highlight pilavapadin's potential to improve pain management care for patients with diabetic peripheral neuropathic pain (DPNP)

Breadth of the data across Phase 2 program to be discussed at Arrowhead's 19th Annual Pain Summit

THE WOODLANDS, Texas, Sept. 11, 2025 (GLOBE NEWSWIRE) -- [Lexicon Pharmaceuticals, Inc.](#) (Nasdaq: LXRX) today announced the presentation of clinical data for its investigational, AAK1-inhibitor, pilavapadin, for the treatment of diabetic peripheral neuropathic pain (DPNP) at three upcoming medical meetings.

Details for the presentations are as follows:

NeuroDiab, September 11-14 in Bucharest, Romania:

- **Lecture 3:** New Promise for Painful Diabetic Neuropathy: Results from recently finished clinical trials of Pilavapadin, an oral, non-opioid, AAK1 inhibitor for diabetic peripheral neuropathic pain
- **Date:** Saturday, September 13, 2025
- **Time:** 11:15 a.m. CEST
- **Presenter:** Rodica Pop-Busui M.D., Ph.D., Jordan Schnitzer Chair in Diabetes, Professor of Medicine and Division Head, Endocrinology, Diabetes and Clinical Nutrition Director, Harold Schnitzer Diabetes Center, Oregon Health & Science University

European Association for the Study of Diabetes (EASD), September 16-19 in Vienna, Austria:

- **Oral Presentation:** Pilavapadin, an oral, non-opioid, AAK1 inhibitor for diabetic peripheral neuropathic pain (DPNP): results from a Phase 2b, dose-ranging, randomized, placebo-controlled, multicenter study
- **Date:** Wednesday, September 17, 2025
- **Time:** 10:30 a.m. CEST
- **Location:** Sofia Hall
- **Presenter:** Rodica Pop-Busui M.D., Ph.D., Jordan Schnitzer Chair in Diabetes, Professor of Medicine and Division Head, Endocrinology, Diabetes and Clinical Nutrition Director, Harold Schnitzer Diabetes Center, Oregon Health & Science University

Arrowhead's 19th Annual Pain Therapeutics Summit, October 13-14 in San Diego, CA:

- **Poster:** Pilavapadin in Neuropathic Pain: Results from the Phase 2b PROGRESS Trial in Patients with Diabetic Peripheral Neuropathic Pain
- **Date:** Monday, October 13, 2025
- **Time:** 3:25 p.m. PT
- **Presenter:** Suma Gopinathan Ph.D., VP Clinical Development, Lexicon Pharmaceuticals

About Pilavapadin

Discovered using Lexicon's unique approach to gene science, pilavapadin (LX9211) is a potent, once-daily, orally delivered, selective, investigational small molecule inhibitor of AAK1, a novel target for neuropathic pain which inhibits reuptake and recycling of neurotransmitters involved in pain signaling without affecting opiate pathways. Lexicon identified AAK1 in its target discovery efforts as a promising approach for the treatment of neuropathic pain. Preclinical studies of pilavapadin demonstrated central nervous system penetration and reduction in pain behavior in models of neuropathic pain without affecting opiate pathways.

About Lexicon Pharmaceuticals

Lexicon is a biopharmaceutical company with a mission of pioneering medicines that transform patients' lives. Through the

Genome5000™ program, Lexicon's unique genomics target discovery platform, Lexicon scientists studied the role and function of nearly 5,000 genes and identified more than 100 protein targets with significant therapeutic potential in a range of diseases. Through the precise targeting of these proteins, Lexicon is pioneering the discovery and development of innovative medicines to treat disease safely and effectively. Lexicon has a pipeline of promising drug candidates in discovery and clinical and preclinical development in neuropathic pain, hypertrophic cardiomyopathy (HCM), obesity, metabolism and other indications. Safe Harbor Statement

This press release contains "forward-looking statements," including statements relating to Lexicon's financial position and long-term outlook on its business, including the commercialization of its approved products and the clinical development of, regulatory filings for, and potential therapeutic and commercial potential of pilavapadin and its other drug candidates. In addition, this press release also contains forward looking statements relating to Lexicon's growth and future operating results, discovery, development and commercialization of products, strategic alliances and intellectual property, as well as other matters that are not historical facts or information. All forward-looking statements are based on management's current assumptions and expectations and involve risks, uncertainties and other important factors, specifically including Lexicon's ability to meet its capital requirements, successfully commercialize its approved products, successfully conduct preclinical and clinical development and obtain necessary regulatory approvals of its other drug candidates on its anticipated timelines, achieve its operational objectives, obtain patent protection for its discoveries and establish strategic alliances, as well as additional factors relating to manufacturing, intellectual property rights, and the therapeutic or commercial value of its approved products and other drug candidates. Any of these risks, uncertainties and other factors may cause Lexicon's actual results to be materially different from any future results expressed or implied by such forward-looking statements. Information identifying such important factors is contained under "Risk Factors" in Lexicon's annual report on Form 10-K for the year ended December 31, 2024, as filed with the Securities and Exchange Commission. Lexicon undertakes no obligation to update or revise any such forward-looking statements, whether as a result of new information, future events or otherwise.
